

TASK 8

Muhammad Azhar Bhutto 2280121

The screenshot shows the Azure Resource Manager interface for managing resource groups. On the left, a sidebar lists various services like Resource Manager, All resources, and Resource groups. The 'Resource groups' section is selected. The main pane displays a list of resource groups with checkboxes next to their names. The group 'myRGLockss' is highlighted. A message at the top indicates a new version of the browser is available. To the right, a detailed view of the 'myRGLockss' resource group is shown. It includes tabs for Overview, Activity log, Access control (IAM), Tags, Events, and Settings. Under Settings, there are sections for Deployments, Security, Deployment stacks, Policies, Properties, Locks, and Cost Management. A prominent message states: 'Delete resource group myRGLockss failed' because it is locked. A button 'Help me troubleshoot' is available. Below this, a search bar and filter options are present. A large message 'No resources match your filters' is displayed with a 'Learn more' link.

The screenshot shows the Azure Storage account overview for 'lab08storageacc'. The left sidebar contains links for Overview, Activity log, Tags, Diagnose and solve problems, Access Control (IAM), Data migration, Events, Storage browser, Storage Mover, Partner solutions, Resource visualizer, Data storage, Security + networking, Data management, Settings, Monitoring, and Monitoring (classic). The main pane displays the storage account's properties, including its resource group (myRGLockss), location (westeurope), primary/secondary locations (West Europe, North Europe), subscription ID, disk state (Primary: Available, Secondary: Available), and tags. The 'Properties' tab is selected. To the right, a 'Delete storage account' dialog box is open. It informs the user that the storage account and its contents will be deleted. It lists the 'Resource to be deleted' as 'lab08storageacc'. It also lists 'Dependent resources to be deleted', which include Containers, File shares, Tables, and Queues. A note states that the storage account can't be deleted because it has a delete lock. Buttons for 'Delete' and 'Cancel' are at the bottom, along with a 'Give feedback' link.
